

ARP VOLUNTEER FIRE DEPARTMENT

BOX 42

ARP, TEXAS 75750

To whom it may concern:

The Arp VFD has built and put into use Arp Station 3. This station houses an ISO approved engine. The station is located at 17852 cr 285 Arp, Texas.

With this being said we encourage all citizens living within the 5-mile range of the station to check with your home owner's insurance company to see if this will affect the ISO rating. Most home owners outside of the 5-mile range will have an ISO rating of 10. Living within the 5 miles should lower your ISO rating from a 10 down to a 6 therefore saving you money.

This station was built strictly from donations made to the fire department from the community. We appreciate your donations and will strive to make our community better and safer for community members.

Thanks

Arp Volunteer Fire Department

Fire Chief – Mack Arnold

Asst. Chief – Gary McDonald
